## **DETAILED ACTION**

### ***Application Status***

1. Claims 1-29 are pending in the instant application

### ***Restriction***

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
  - I. Claims 1-12 and 27, drawn to polynucleotides coding for the dep67 gene, vectors and host cells thereof, classified in class 536, subclass 23.1.
  - II. Claims 13-26, drawn to methods of making L-amino acids, classified in class 435, subclass 106.
  - III. Claims 28-29, drawn to methods for isolating nucleic acids related to the dep67 gene, classified in class 435, subclass 6.

3. The inventions are distinct, each from the other because of the following reasons:

Group I is related to Groups II and III as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case, the polynucleotides can be used for a materially different process of using that product, such as in the recombinant production of the encoded enzyme. Thus, Group I is patentably distinct from Group II and III. Because these inventions are distinct for the

Art Unit: 1652

reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Groups II and III are related as processes using the same polynucleotides. However, the Groups are distinct because they require distinct method steps using distinct reagents to produce distinct products. Moreover, these distinct methods are not disclosed as being used together. Thus, Groups II and III are patentably distinct. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

#### ***Notice of Possible Rejoinder***

4. The Examiner notes that if product claims in Group I are found directed to an allowable product, then process claims in Groups II and III, which are directed to processes of using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, would now be rejoined pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86; see also M.P.E.P. § 821.04, *In re* Ochiai, and *In re* Brouwer). Since process claims would be rejoined and fully examined for patentability under 37 C.F.R. § 1.104, Applicants are instructed to amend said claims as deemed necessary according to rejections made against the elected claims.

#### ***Election***

5. A telephone call was made to Robert Weilacher on September 3, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1652

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).

***Conclusion***

6. A complete response to the instant Office action must include an election of invention.
